LETTER OF RECOMMENDATION

I am more than pleased to have this opportunity to recommend Sai Faneesh Yezzu for the master's program in your prestigious university. I have known Sai Faneesh for more than one and half year now, he has been working as a Sr. Security Engineer for our team under my leadership. During this time, I have developed a very high regard for Sai Faneesh based on the outstanding contributions that he made to our team.

Sai Faneesh had quickly made himself a valuable member of our team by developing and understanding the complexities of the business work. He developed extensive knowledge in the field of cyber security, with proficiency in Endpoint and Network (Firewall) Security within no time. We as a team manage client's security architecture and deploy different security devices on network layer and application layer. I was impressed the way Sai Faneesh handled these kinds of works with lesser experience than his peers.

During his work with us, he was capable to manage multiple clients and fulfilling their requirements on time. His skills on technical issues and proficiency in communication helped him earn appreciations from clients as well. We also address multiple types of malware, as well as blended threats and spam, and protect intrusion at both the network and endpoint layers. I can confirm that Sai Faneesh has excelled in these aspects within no time. He is very enthusiastic about this work and provides constructive insight when faced with problems. I have always found him to be competent and quick to grasp new technologies. His determination to learn is also reflected with his will to certify knowledge he has, Certified Ethical Hacker (CEH) is one of them.

I am confident that he will continue to be productive, add value to the classroom discussions and will prove to be a great asset to your graduate school. With this, I hereby strongly recommend Sai Faneesh Yezzu to for admission in your university. Please feel free to reach out to me if you need any further information.
